When you think of the holocaust, what do you think about? Is it the millions of Jews lives that were taken? Or is it a great, but wicked speaker named Adolph Hitler? Adolph Hitler, Auschwitz, and American involvement are some key roles in the holocaust. Adolph Hitler is probably one of the worst people ever to live. When people talk of evil deeds he is at the top of the list. He was a man of words, and could use them to his advantage. He had an ability to talk and make the Germans believe that the Jews were the reason for the problems in their country; so he gave them the idea to move them out. Then under his command they forced the Jews in to death camps.
